

PROJECT DEVELOPMENT AND ASSESSMENT

For over 35 years, Indec has collaborated with clients early in the business case process to help form, refine, analyse, and capture robust value propositions for evidence-based decision making.

Indec proactively responds to our clients' project needs to ensure project development requirements and business cases respond to the customer requirements, anticipated investment risks as well as investment assurance requirements.

Project Development and Assessment

Investment decisions rely upon a clear, evidence-based definition of the business need, together with credible options and funding analysis. Feasibility assessments and business cases must succinctly document the need for change as well as the recommended solution and how it will be successfully implemented.

We work with clients throughout the investment decision and funding process to ensure a rigorous, defensible process. Our approach is collaborative but challenging and we are not afraid to test assumptions including our own. We are direct and respectful and always apply evidence-based principals in decision making.

Our services include:

- Business need and requirements
- Concept design and specification
- Feasibility studies
- Stakeholder engagement and communications documentation
- Options development and cost-benefit evaluation
- Masterplanning alignment
- Spatial analysis and benchmarking
- Evidence gathering, data analytics and visualisation
- financial and economic analyses and commercialisation
- Implementation and change management planning
- Program and project management coordination
- Business case preparation, including supporting management plans
- Value-for-money frameworks
- Procurement strategies
- Benefits realisation analysis

Investment Gateways and Reviews

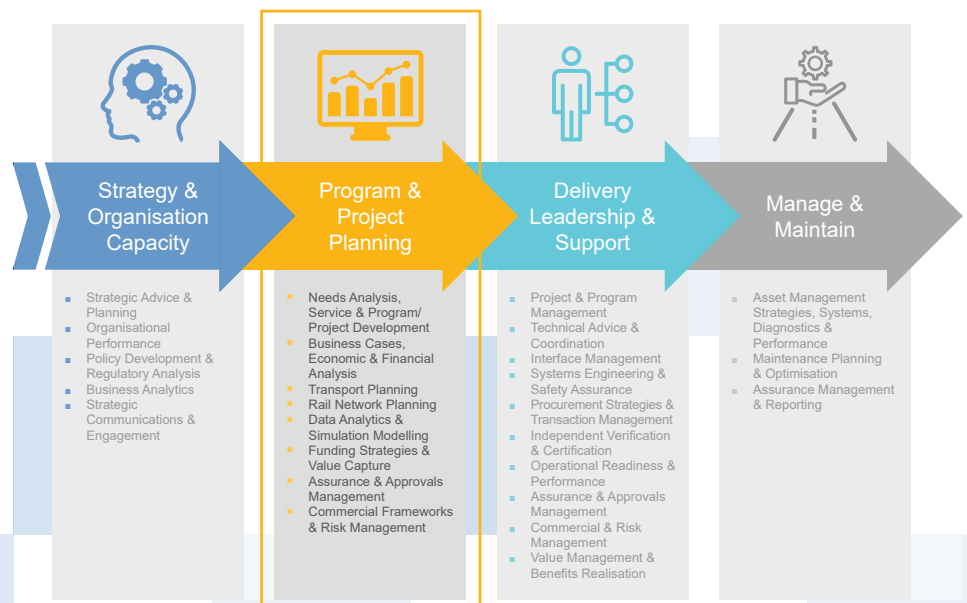

Where funding and oversight agencies require an assessment of the investment process and business case, Indec is able to provide the appropriate level of review and evaluation which can be used to either improve the business or provide lessons learned for future investments.

Our services include:

- Gateway review process
- Service level agreements
- Post-project evaluations
- Project management assurance and process improvement

Our staff have worked in senior executive management and delivery roles across public utility organisations, State transport agencies, technology providers, rail operators, infrastructure contractors and Defence.

As a business with deep experience at the state government level, Indec has delivered best-practice business case services that comply with investment management standards.

PROJECT EXPERIENCE

Program Management Office, Feasibility Study and Technical Advisor | Victorian School Building Authority

VIC, Australia | 2013 – 2018

Further to the development, establishment and management of the Program Management Office for the delivery of all capital and maintenance projects greater than \$200,000, Indec was further engaged to:

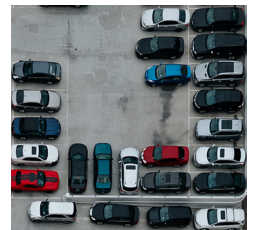

- Provide oversight to the capital and maintenance projects assurance and gateway processes across the stakeholders, contractors and consultants
- Provide technical advisory services for the New Schools Public-Private Partnership Project and acted as a client representative undertaking site audits for the Victorian Department of Education and Training
- Undertake a feasibility study for the Gisborne Primary School to develop options for the provision of new learning and gymnasium facilities

Commuter Car Park Program Technical Writer and Business Case | Transport for NSW

Sydney, NSW, Australia | 2019 – 2020

Indec provided technical writing and business case support to the Commuter Car Park program business case development phase. Key deliverables included supporting the Program team members in the effective management of interdependencies and key program interfaces, supporting the Program Lead in the management of integrated program controls and performance of the program as well as conducting an economic and financial appraisal, manage cost estimation, data analysis and visualisation and spatial data services.

Burial Assistance Scheme Cost-Benefit Analysis | Queensland Department of Justice and Attorney-General

QLD, Australia | 2019

Under the Queensland Burials Assistance Act 1965 (the Act), the Department of Justice and Attorney-General (DJAG) has a duty to arrange the burial or cremation of a deceased person if no suitable arrangements have otherwise been made. Indec was engaged to provide a cost-benefit analysis of the Burial Assistance Scheme administered by Queensland Coronal Services.
